As you may have heard, there has recently been a debate regarding trans women competing in women’s high school and college sports. Specifically, I’m referring to biological males who now identify as female. With this in mind please tell me which of the following comes closest to your opinion.

Some people say that biological males should not be allowed to compete in women’s sports. They say that they have a clear unfair advantage and allowing them to compete with women will rob female athletes of scholarships and other opportunities.

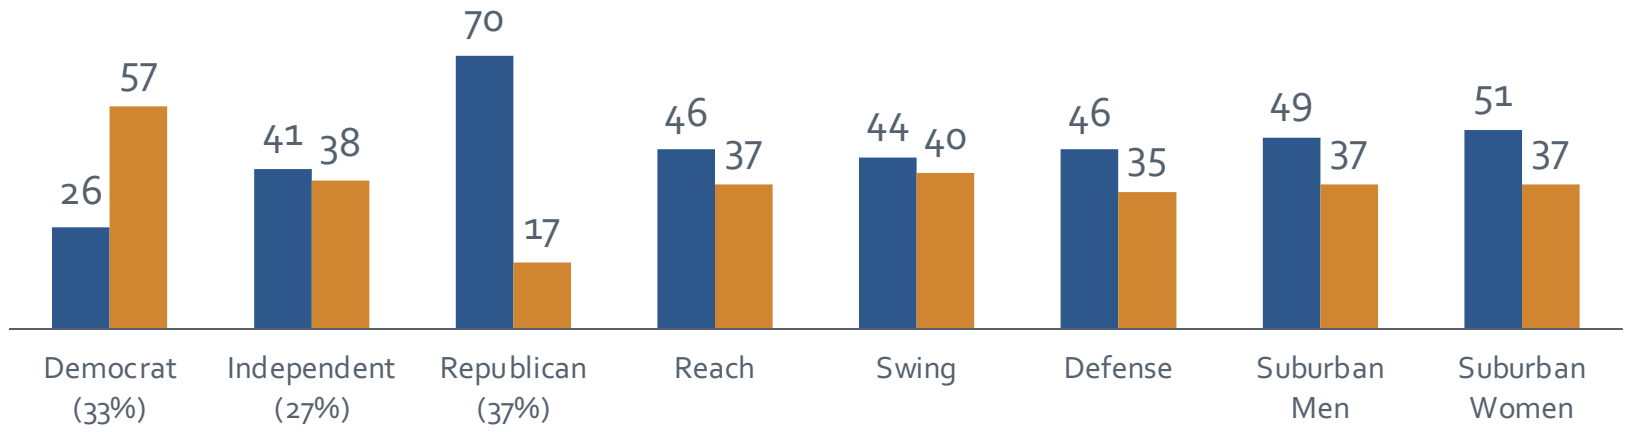

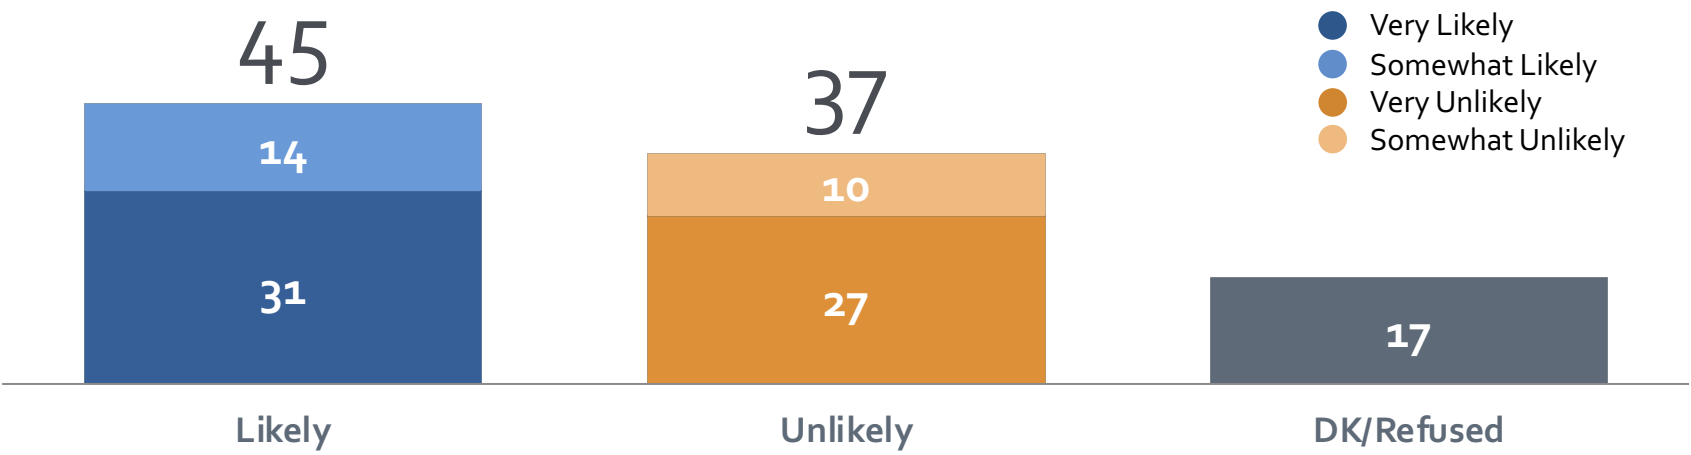

Other people say that trans women are women, and that not allowing them to compete with the gender they identify with is unfair discrimination.

ESG INFLUENCE ON CONSUMER

If you find a product that you like, but then discover the company promotes a very liberal woke agenda, how likely are you to stop purchasing that product? Would you say you would be very likely, somewhat likely, somewhat unlikely or very unlikely to stop purchasing?

Many liberal investment banks now discriminate against companies that hold traditional conservative values. These investment banks practice a policy called Environmental Social and Governance, or ESG, and they invest based on their political values instead of seeking the highest return on investment. Please tell me if you agree or disagree with the following statement. State pension funds and governments should not continue to place their funds with these investment banks.
